Logistics Consulting Services

If effective logistics management in the Asia-Pacific region is important to the success of your business, it may help you to be aware of our company's services.

Asia Logistics Limited provides in-depth expertise in diagnosing issues and implementing optimal solutions in these areas:

- Logistics operations
- Customer service improvement
- Cost reduction
- Capacity improvement
- Local and international transportation
- Materials handling
- Facility location and design
- Inventory management
- Procurement
- Channel management strategy
- Outsourcing logistics services
- Logistics information technology

We offer these services in the Consumer, Industrial, Retail, Utility and logistics service sectors.

Our Skills

Bill Galvin, Director of *Asia Logistics Limited*, has specialized in logistics and supply chain management for 32 years, the last 18 in Asia. He is based in Hong Kong and is well qualified to provide leading-edge consulting services:

- 12 years working with leading consulting firms in London and Hong Kong (PWC and Deloitte)
- Hands-on experience in senior management positions (Unilever and Sainsbury's)
- In-depth technical knowledge
- Fellow of the Chartered Institute of Logistics & Transport (UK)
- Fellow of the Institute of Business Consultants (UK)

Our Client Experience

Our clients include Hutchison Whampoa (various divisions), China Merchants Group, HSBC, Jardine Matheson, the Hong Kong Airport Authority and Maersk. We have also provided technical support to clients on behalf of other professional firms, including KPMG (e.g. for Philip Morris and Sears). Our experience covers most Asian countries, and we have served many clients in various industries in China.

Our Approach

We offer "Big Four" technical competence with moderate fees. We usually work alongside small project teams of client staff, completing projects together. This teamwork approach offers good value-for-money, and also ensures real knowledge transfer and simpler implementation.
